

# Awesome Nano Banana Pro

---

A curated collection of the **best Nano Banana prompts**, image generation styles, and resources for advanced AI visual experiments.

This repository focuses on **high-fidelity image prompts** sourced from X (Twitter), WeChat, Replicate, and top prompt engineers. Whether you are looking for **photorealistic portraits, stylized aesthetics**, or complex creative experiments, you will find the most effective inputs here to unlock the full potential of the model.

## 1. Photorealism & Aesthetics

Optimize your visual output with these **high-fidelity prompts**. These are designed to utilize the model's ability to render complex lighting, textures, and specific eras.

## 1.1. Hyper-Realistic Crowd Composition

*Handling complex compositions with multiple famous faces and specific lighting.*

**Prompt:**

Create a hyper-realistic, ultra-sharp, full-color large-format image featuring a massive group of celebrities from different eras, all standing together in a single wide cinematic frame. The image must look like a perfectly photographed editorial cover with impeccable lighting, lifelike skin texture, micro-details of hair, pores, reflections, and fabric fibers.

**GENERAL STYLE & MOOD:** Photorealistic, 8k, shallow depth of field, soft natural fill light + strong golden rim light. High dynamic range, calibrated color grading. Skin tones perfectly accurate. Crisp fabric detail with individual threads visible. Balanced composition, slightly wide-angle lens (35mm), center-weighted. All celebrities interacting naturally, smiling, posing, or conversing. Minimal background noise, but with enough world-building to feel real.

**THE ENVIRONMENT:** A luxurious open-air rooftop terrace at sunset overlooking a modern city skyline. Elements include: Warm golden light wrapping around silhouettes. Polished marble.

## 1.2. 2000s Mirror Selfie

A structured JSON prompt to generate an authentic early-2000s aesthetic with flash photography and nostalgic elements.

**Prompt:**

**Create a 2000s Mirror Selfie of yourself using Gemini Nano Banana.**

```
{  
  "subject": {  
    "description": "A young woman taking a mirror selfie with very long  
      voluminous dark waves and soft wispy bangs",  
    "age": "young adult",  
    "expression": "confident and slightly playful",  
    "hair": {  
      "color": "dark",

### 1.3. Victoria's Secret Style Photoshoot

*Great for creating high-glamour, backstage-style fashion photography with intricate details.*

**Prompt:**

Create a glamorous photoshoot in the style of Victoria's Secret. A young woman attached in the uploaded reference image ( Keep the face of the person 100% accurate from the reference image ) stands almost sideways, slightly bent forward, during the final preparation for the show. Makeup artists apply lipstick to her (only her hands are visible in the frame). She is wearing a corset decorated with beaded embroidery and crystals with a short fluffy skirt, as well as large feather wings. The image has a "backstage" effect.

The background is a darkly lit room, probably under the podium. The main emphasis is on the girl's face and the details of her costume. Emphasize the expressiveness of the gaze and the luxurious look of the outfit. The photo is lit by a flash from the camera, which emphasizes the shine of the beads and crystals on the corset, as well as the girl's shiny skin. Victoria's Secret style: sensuality, luxury, glamour. Very detailed. Important: do not change the face.

Source: [@NanoBanana\\_labs](#)

## 1.4. 1990s Camera Style Portrait

*Test the model's ability to replicate specific film textures, flash photography, and era-specific atmosphere.*

### Prompt:

Without changing her original face, create a portrait of a beautiful young woman with porcelain-white skin, captured with a 1990s-style camera using a direct front flash. Her messy dark brown hair is tied up, posing with a calm yet playful smile. She wears a modern oversized cream sweater. The background is a dark white wall covered with aesthetic magazine posters and

stickers, evoking a cozy bedroom or personal room atmosphere under dim lighting. The 35mm lens flash creates a nostalgic glow.

Source: [@kingofdairyque](#)

## 1.5. One-Click Business Photo (Silicon Valley Style)

*Transforms casual photos into professional studio headshots using specific lens and lighting instructions.*

**Prompt:**

Keep the facial features of the person in the uploaded image exactly consistent . Dress them in a professional navy blue business suit with a white

shirt, similar to the reference image. Background : Place the subject against a clean, solid dark gray studio photography backdrop . The background should have a subtle gradient , slightly lighter behind the subject and darker towards the edges (vignette effect). There should be no other objects. Photography Style : Shot on a Sony A7III with an 85mm f/1.4 lens , creating a flattering portrait compression. Lighting : Use a classic three-point lighting setup . The main key light should create soft, defining shadows on the face. A subtle rim light should separate the subject's shoulders and hair from the dark background. Crucial Details : Render natural skin texture with visible pores , not an airbrushed look. Add natural catchlights to the eyes . The fabric of the suit should show a subtle wool texture.Final image should be an ultra-realistic, 8k professional headshot.

Source: [WeChat Article](#)

## 1.6. Emotional Film Photography

*Creates a cinematic, nostalgic “Kodak Portra” look while maintaining facial consistency.*

**Prompt:**

Keep the facial features of the person in the uploaded image exactly consistent . Style : A cinematic, emotional portrait shot on Kodak Portra 400

film . Setting : An urban street coffee shop window at Golden Hour (sunset) . Warm, nostalgic lighting hitting the side of the face. Atmosphere : Apply a subtle film grain and soft focus to create a dreamy, storytelling vibe. Action : The subject is looking slightly away from the camera, holding a coffee cup, with a relaxed, candid expression. Details : High quality, depth of field, bokeh background of city lights.

Source: [WeChat Article](#)

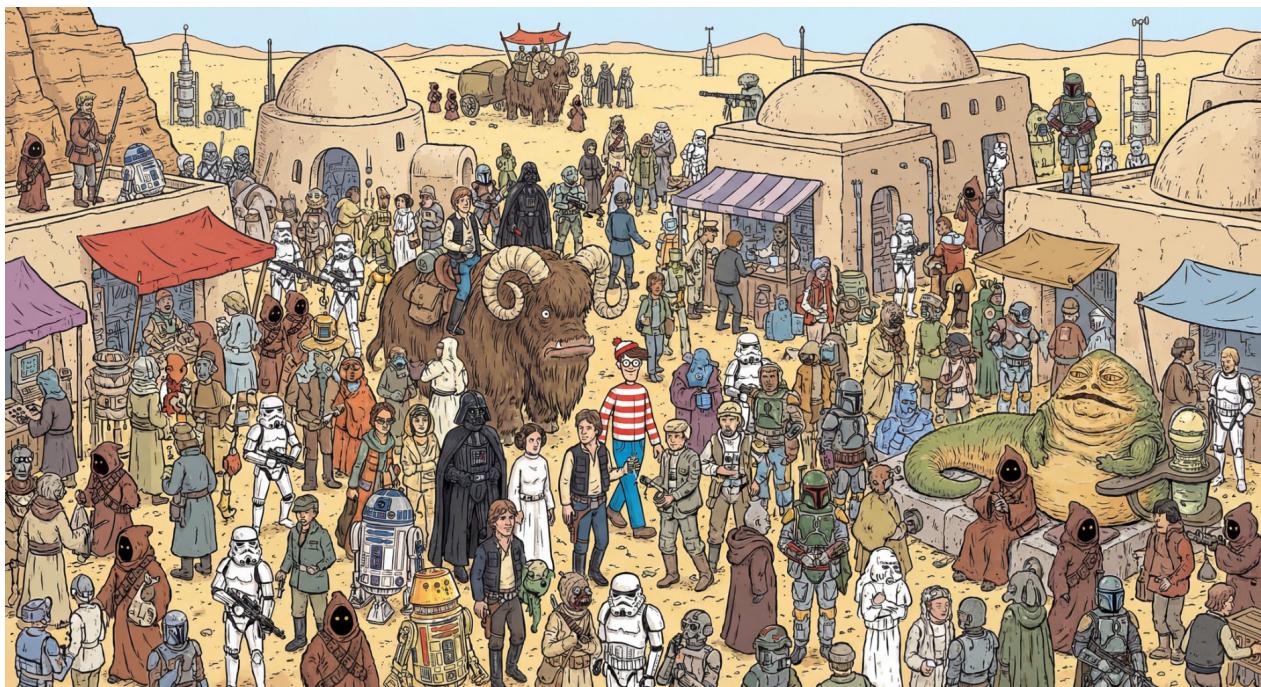

---

## 2. Creative Experiments

Prompts focused on pushing the boundaries of composition, crowd generation, minimalism, and temporal consistency.

### 2.1. Star Wars “Where’s Waldo”

*A complex prompt testing the model’s ability to handle dense crowds and specific character recognition.*

**Prompt:**

A where is waldo image showing all Star Wars characters on Tatooine

First one to pull this off. First take. Even Waldo is there.

Source: [@creacas](#)

## 2.2. Aging Through the Years

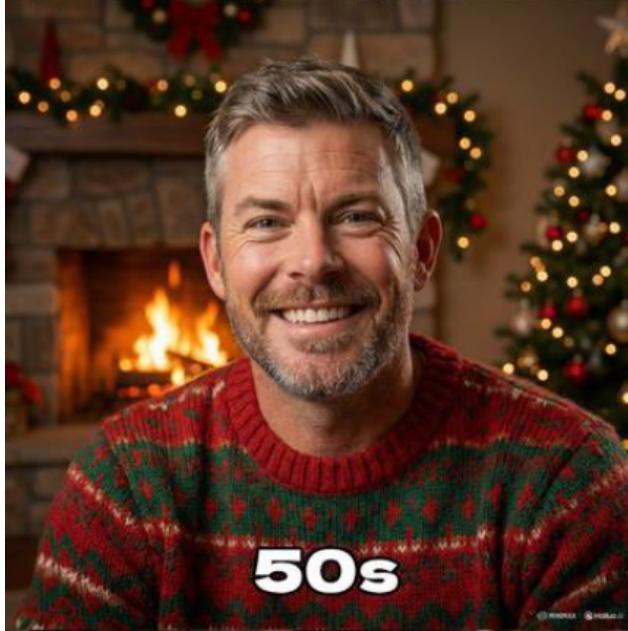

*Demonstrates temporal consistency and aging effects on a single subject.*

**30s**

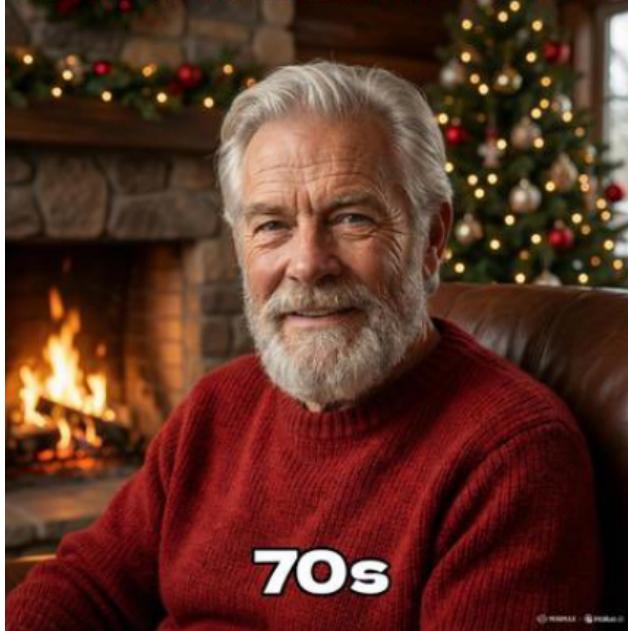

**40s**

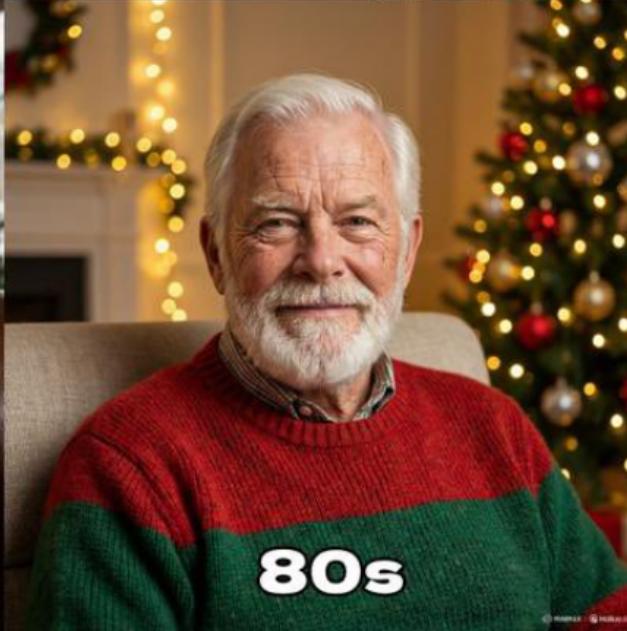

**50s**

**60s**

**70s**

**80s**

**Prompt:**

"Generate the holiday photo of this person through the ages up to 80 years old"

Source: [@dr\\_cintas](#)

## 2.3. Recursive Visuals

*Demonstrates the model's ability to handle infinite loop logic (Droste effect).*

**Prompt:**

recursive image of an orange cat sitting in an office chair holding up an iPad.  
On the iPad is the same cat in the same scene holding up the same iPad.  
Repeated on each iPad.

Source: [@venturetwins](#)

## 2.4. Coordinate Visualization

*Generates a specific location and time based purely on latitude/longitude coordinates.*

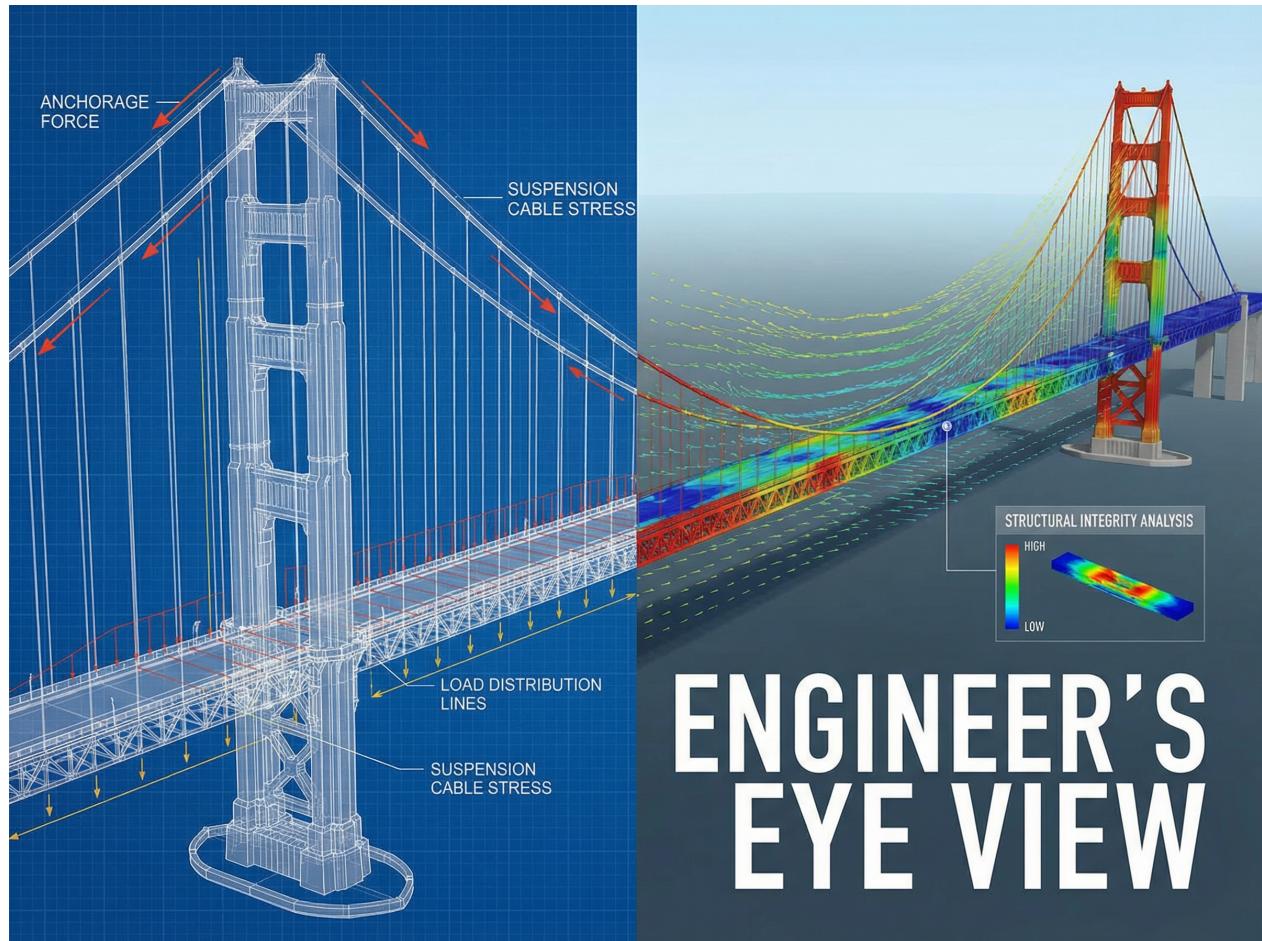

**Prompt:**

35.6586° N, 139.7454° E at 19:00

Source: [Replicate](#)

## 2.5. Conceptual Visualization

*Interpretative rendering of how a specific group (engineers) visualizes a landmark.*

**Prompt:**

How engineers see the San Francisco Bridge

Source: [Replicate](#)

## 2.6. Literal Interpretation

*Interprets a filename as a visual subject.*

**Prompt:**

rare.jpg

Source: [Replicate](#)

## 2.7. Multi-Subject Compositing

*Combines multiple input portraits into a single cohesive group photo with a specific expression.*

## Input References

## Generated Output

**Prompt:**

an office team photo, everyone making a silly face

Source: [Replicate](#)

## 2.8. Whiteboard Marker Art

*Simulating specific drawing media (faded marker) on glass textures.*

**Prompt:**

Create a photo of vagabonds musashi praying drawn on a glass whiteboard in a slightly faded green marker

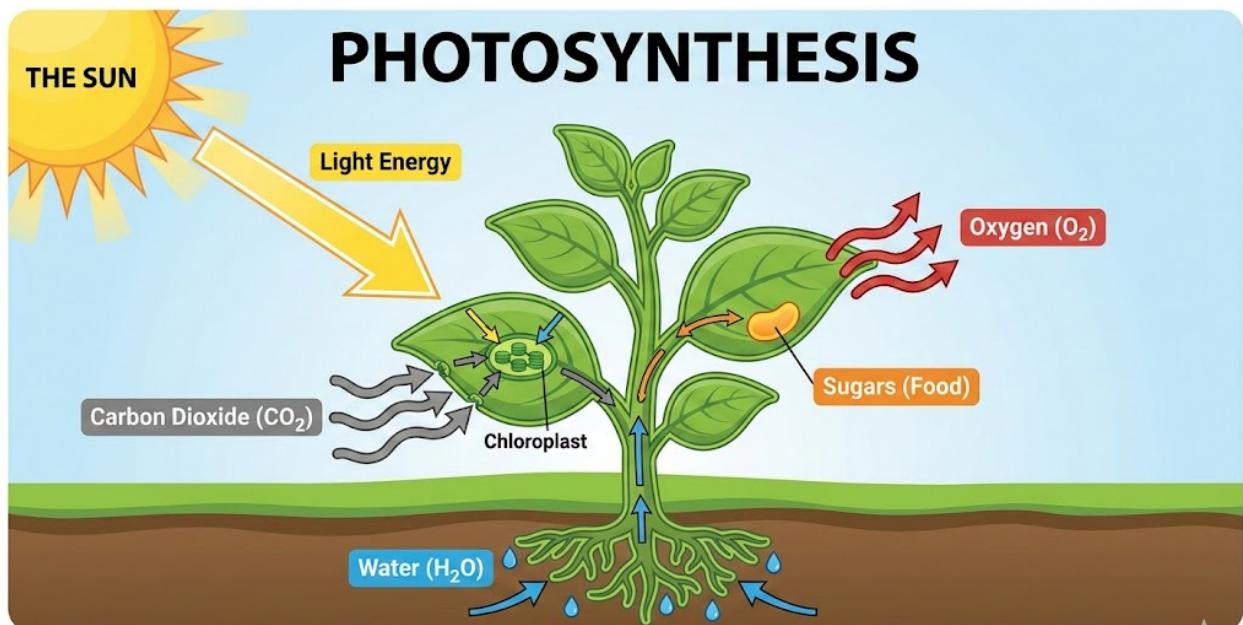

Source: [@nicdunz](#)

---

### 3. Education & Knowledge

#### 3.1. Concept Visualization (Text to Infographic)

Converts textual concepts into clear, educational vector illustrations.

**Prompt:**

Create an educational infographic explaining [Photosynthesis]. Visual Elements : Illustrate the key components: The Sun, a green Plant, Water (H<sub>2</sub>O) entering roots, Carbon Dioxide (CO<sub>2</sub>) entering leaves, and Oxygen (O<sub>2</sub>) being released. Style : Clean, flat vector illustration suitable for a high school science textbook. Use arrows to show the flow of energy and matter. Labels : Label each element clearly in English .

(Translation: 生成[光合作用]的教育信息图。视觉元素：太阳、植物、水入根、CO<sub>2</sub>入叶、O<sub>2</sub>释放。风格：适合高中课本的扁平矢量插图，用箭头显示流动。标签：用简体中文清晰标注。)

Source: [WeChat Article](#)

## 4. E-commerce & Virtual Studio

### 4.1. Virtual Model Try-On

*Dresses a model in a specific garment while preserving fabric texture and lighting integration.*

**Prompt:**

Using Image 1 (the garment) and Image 2 (the model), create a hyper-realistic full-body fashion photo where the model is wearing the garment.  
Crucial Fit Details : The [T-shirt/Jacket] must drape naturally on the model's body, conforming to their posture and creating realistic folds and wrinkles .  
High-Fidelity Preservation : Preserve the original fabric texture, color, and any logos from Image 1 with extreme accuracy. Seamless Integration : Blend the garment into Image 2 by perfectly matching the ambient lighting, color temperature, and shadow direction . Photography Style : Clean e-commerce lookbook, shot on a Canon EOS R5 with a 50mm f/1.8 lens for a natural, professional look.

Source: [WeChat Article](#)

## 4.2. Professional Product Photography

*Isolates products from messy backgrounds and places them in a high-end commercial studio setting.*

**Prompt:**

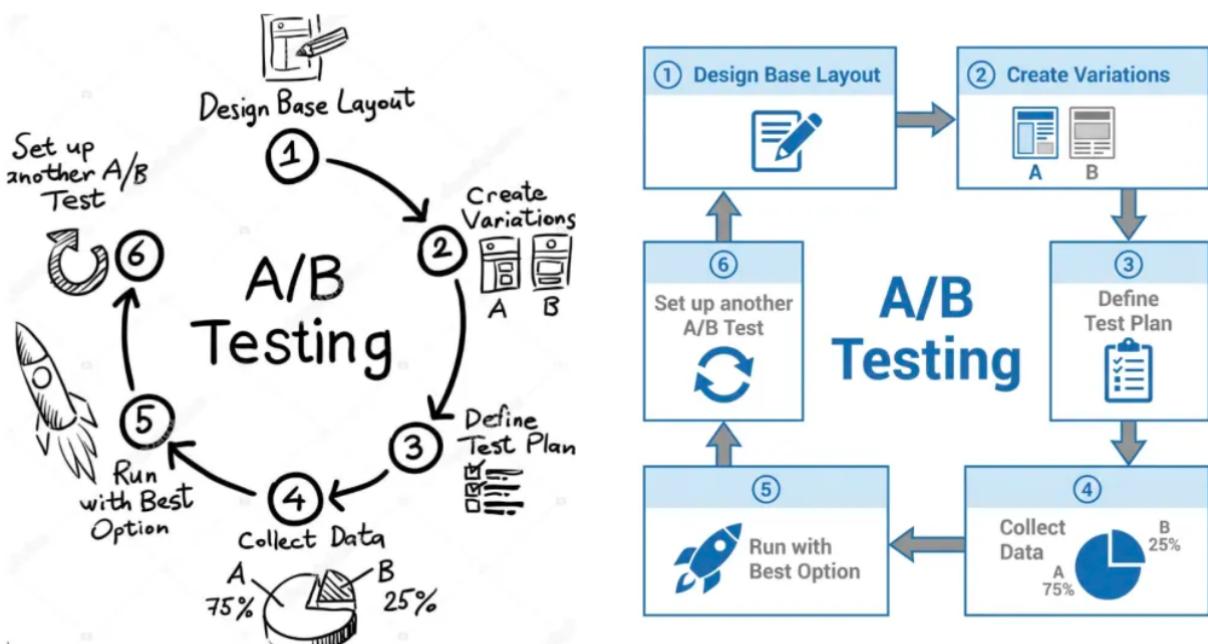

Identify the main product in the uploaded photo (automatically removing any hands holding it or messy background details). Recreate it as a premium e-commerce product shot . Subject Isolation : Cleanly extract the product, completely removing any fingers, hands, or clutter . Background : Place the product on a pure white studio background (RGB 255, 255, 255) with a subtle, natural contact shadow at the base to ground it. Lighting : Use soft, commercial studio lighting to highlight the product's texture and material. Ensure even illumination with no harsh glare. Retouching : Automatically fix any lens distortion, improve sharpness, and color-correct to make the product look brand new and professional .

Source: [WeChat Article](#)

## 5. Workplace & Productivity

### 5.1. Hand-drawn Flowchart to Corporate Charts

*Converts whiteboard sketches into clear, “McKinsey-style” vector presentations.*

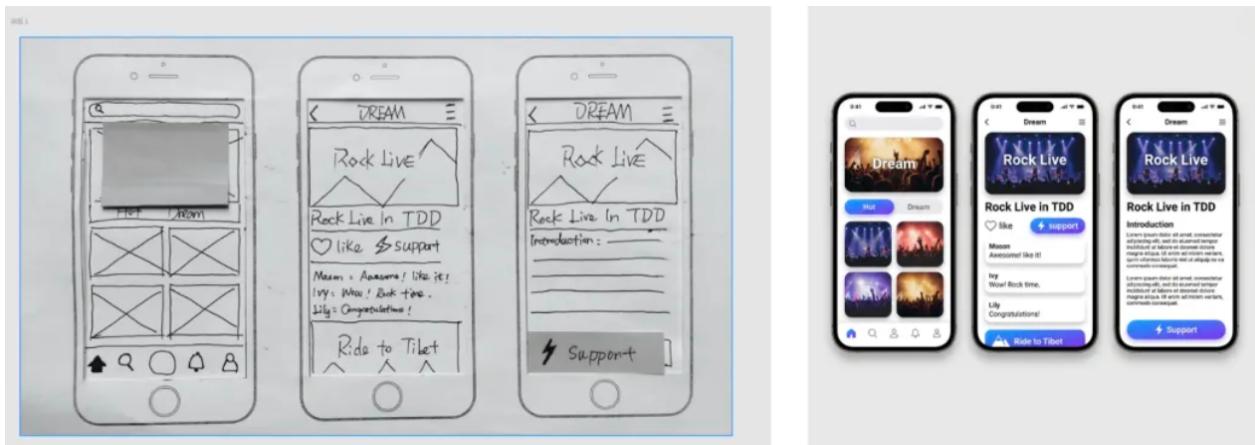

Prompt:

Convert this hand-drawn whiteboard sketch into a professional corporate flowchart suitable for a business presentation. Style Guide : Use a minimalist 'McKinsey-style' aesthetic : clean lines, ample whitespace, and a sophisticated blue-and-gray color palette. Structure : Automatically align all boxes and diamonds to a strict grid . Connect them with straight, orthogonal arrows (90-degree angles only, no curvy lines). Text : Transcribe the handwritten labels into a clear, bold Sans-Serif font (like Arial or Roboto). Output : High-resolution vector-style image on a pure white background.

Source: [WeChat Article](#)

## 5.2. UI Hand-drawn Sketch to High-Fidelity Prototype

*Transforms wireframe scribbles into realistic mobile app mockups.*

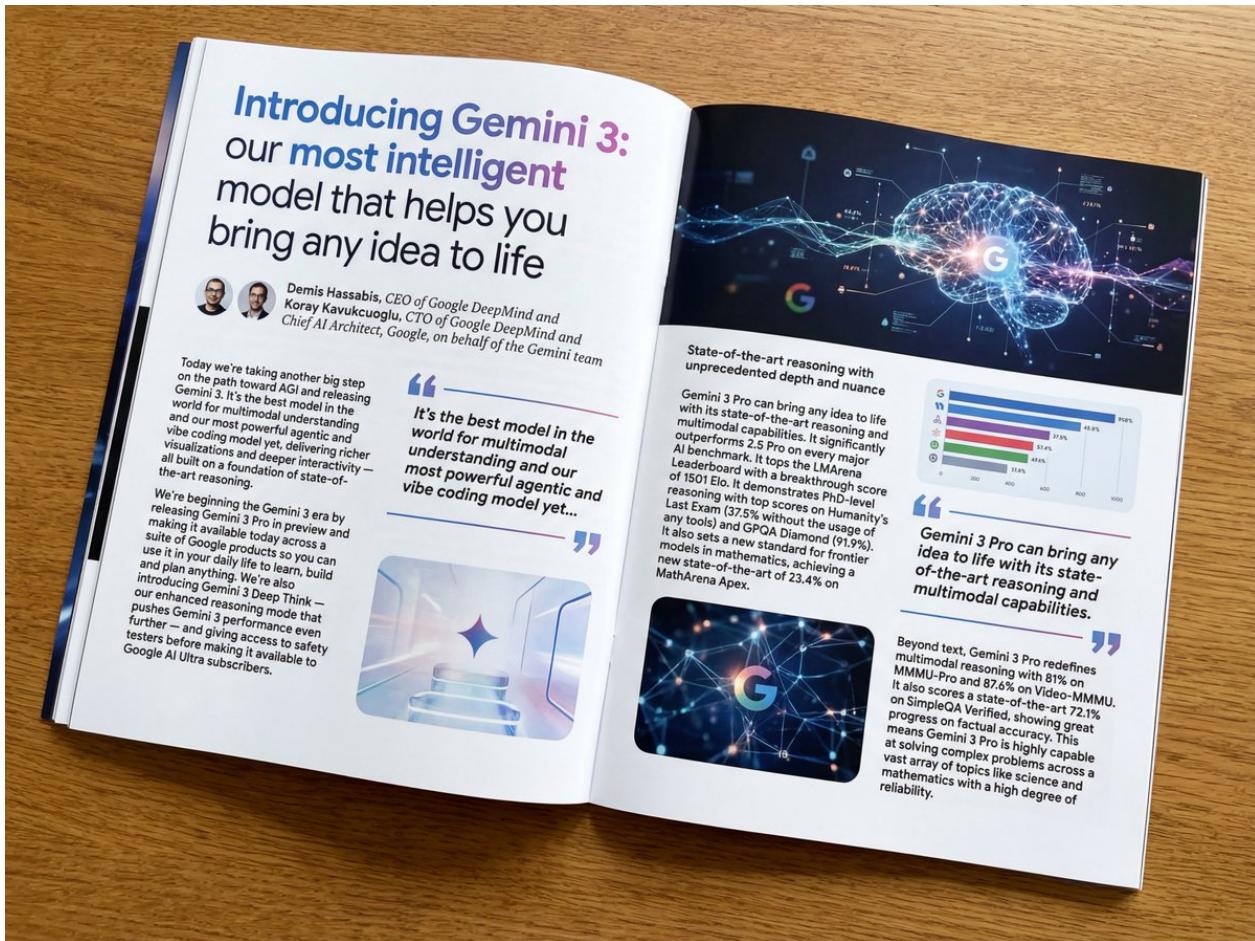

**Prompt:**

Transform this rough wireframe sketch into a high-fidelity UI design mockups for a mobile app. Design System : Apply a modern, clean aesthetics similar to iOS 18 or Material Design 3 . Use rounded corners, soft drop shadows, and a vibrant primary color. Components : Intelligently interpret the sketch: turn scribbles into high-quality placeholder images , convert rough rectangles into proper buttons with gradients , and turn lines into realistic text blocks . Layout : Ensure perfect padding and consistent spacing between elements. Context : Place the design inside a realistic iPhone 16 frame mockups.

Source: [WeChat Article](#)

## 5.3. Magazine Layout Generator

Perfect for visualizing articles in print format with complex typography.

**Prompt:**

Put this whole text, verbatim, into a photo of a glossy magazine article on a desk, with photos, beautiful typography design, pull quotes and brave formatting. The text: [...the unformatted article]

Source: [@fofrAI](#)

## 6. Photo Editing & Restoration

### 6.1. Composition Rescue (Smart Outpainting)

*Expands image ratios (e.g., to 16:9) by intelligently generating matching scenery.*

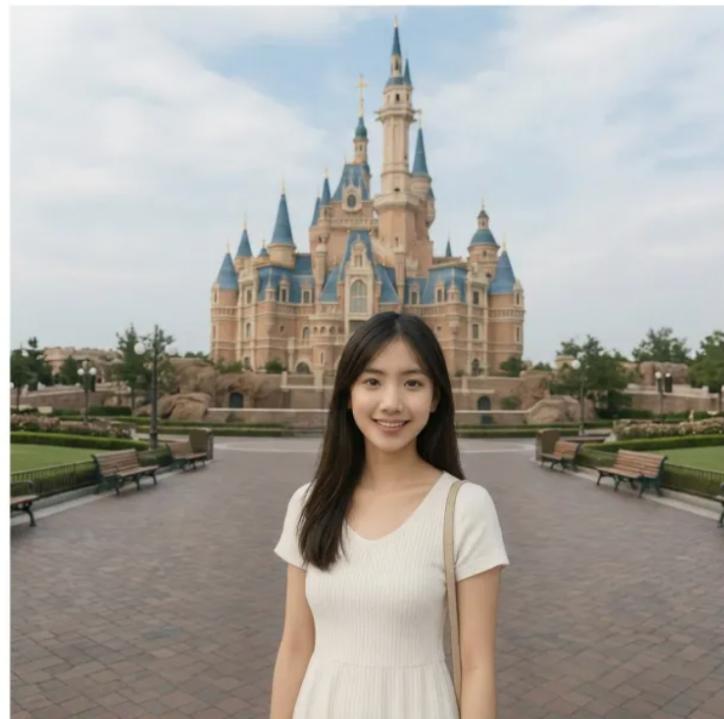

#### Prompt:

Zoom out and expand this image to a 16:9 aspect ratio (computer wallpaper size). Context Awareness : Seamlessly extend the scenery on both left and right sides. Match the original lighting, weather, and texture perfectly. Logical Completion : If there are cut-off objects (like a shoulder, a tree branch, or a building edge) on the borders, complete them naturally based on logical inference. Do not distort the original center image.

Source: [WeChat Article](#)

## 6.2. Smart Crowd Removal

*Removes unwanted people from backgrounds and fills the space with logical textures.*

**Prompt:**

Remove all the tourists/people in the background behind the main subject.  
Intelligent Fill : Replace them with realistic background elements that logically fit the scene (e.g., extend the cobblestone pavement, empty park benches, or grass textures). Consistency : Ensure no blurry artifacts or 'smudges' remain.  
The filled area must have the same grain, focus depth, and lighting as the rest of the photo.

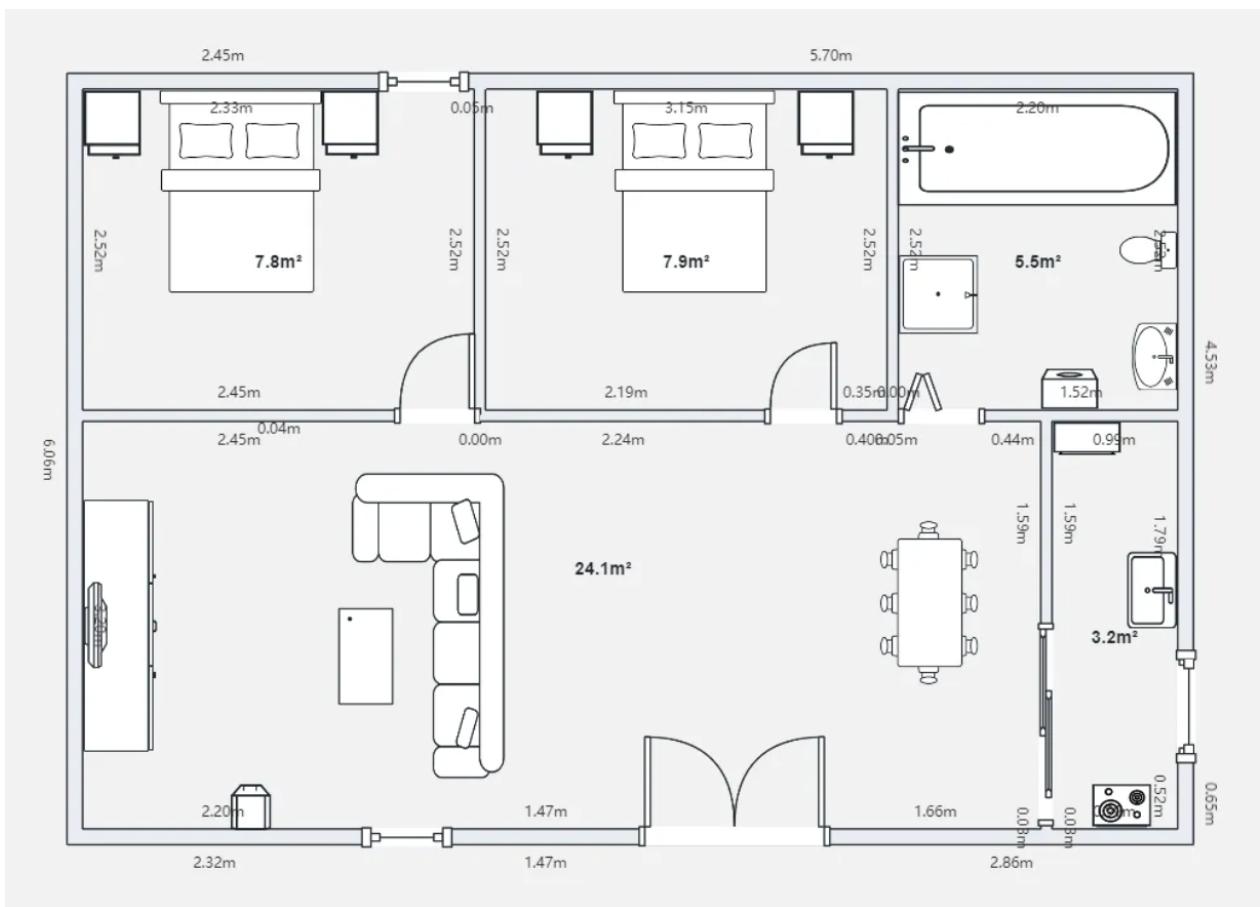

Source: [WeChat Article](#)

---

## 7. Interior Design

### 7.1. Hard Furnishing Preview (Floor Plan to Design)

*Generates a complete design presentation board including perspective views and 3D floor plans from a simple 2D map.*

**Prompt:**

Based on the uploaded 2D floor plan, generate a professional interior design presentation board in a single image. Layout : The final image should be a collage with one large main image at the top, and several smaller images below it. Content of Each Panel :

1. Main Image (Top) : A wide-angle perspective view of the main living area , showing the connection between the living room and dining area.
2. Small Image (Bottom Left) : A view of the Master Bedroom , focusing on the bed and window.
3. Small Image (Bottom Middle) : A view of the Home Office / Study room .

4. Small Image (Bottom Right) : A 3D top-down floor plan view showing the furniture layout. Overall Style : Apply a consistent Modern Minimalist style with warm oak wood flooring and off-white walls across ALL images. Quality : Photorealistic rendering, soft natural lighting.

Source: [WeChat Article](#)

---

## 8. Social Media & Marketing

### 8.1. Viral Cover Image (Youtube/Douyin/TikTok)

*Creates engaging thumbnails with text overlays, exaggerated expressions, and bright graphics.*

# Done in 4 mins!

**Prompt:**

Design a viral video thumbnail using the person from Image 1. Face Consistency : Keep the person's facial features exactly the same as Image 1 ,

but change their expression to look excited and surprised . Action : Pose the person on the left side, pointing their finger towards the right side of the frame. Subject : On the right side, place a high-quality image of [a delicious avocado toast]. Graphics : Add a bold yellow arrow connecting the person's finger to the toast. Text : Overlay massive, pop-style text in the middle: '3分钟搞定!' (Done in 3 mins!). Use a thick white outline and drop shadow. Background : A blurred, bright kitchen background. High saturation and contrast.

Source: [WeChat Article](#)

## 8.2. Commercial Promotional Poster

*Designs professional sales posters with integrated text and high-quality product photography.*

**Prompt:**

Design a professional promotional poster for a [Coffee Shop]. Composition : A cinematic close-up of a steaming cup of cappuccino on a rustic wooden table, autumn leaves in the background (cozy atmosphere). Text Integration :  
1. Main Title : 'Autumn Special' written in elegant, gold serif typography at the top.  
2. Offer : 'Buy One Get One Free' clearly displayed in a modern badge or sticker style on the side.  
3. Footer : 'Limited Time Only' in small, clean text at the bottom. Quality : Ensure all text is perfectly spelled, centered, and integrated into the image's depth of field.

Source: [WeChat Article](#)

---

## 9. Daily Life & Translation

### 9.1. Physical Store/Travel Translation

*Translates menus or signs while preserving the original surface texture (wall, paper, grease).*

## 舒蔡记生煎菜饭价目表

		Green Pepper Shredded Meat Noodles	10¥/bowl		
		Scallion Oil Mixed Noodles	9¥/bowl		
		Cold Noodles	13¥/bowl		

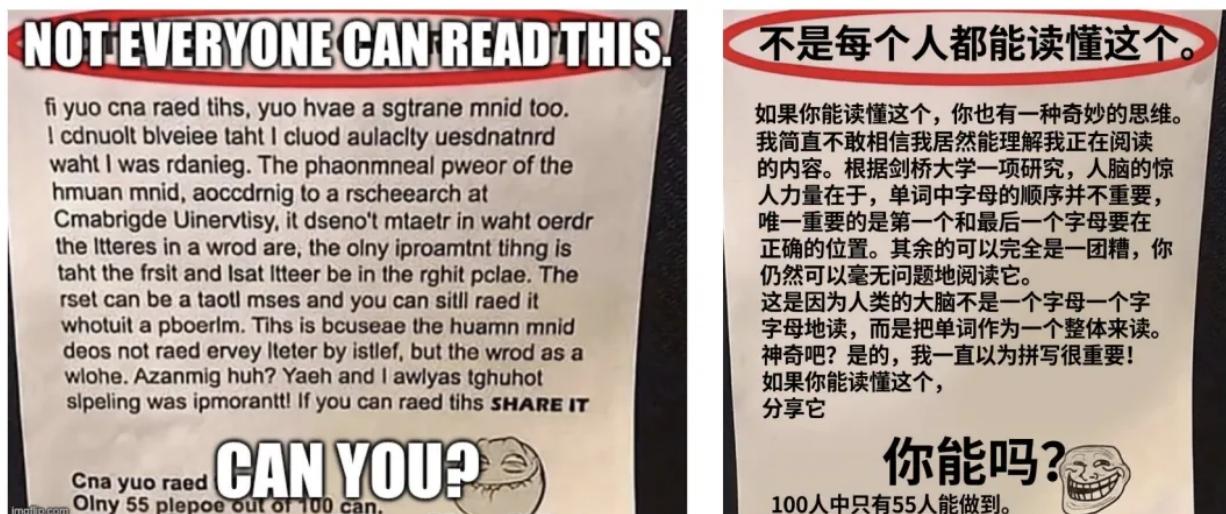

**Prompt:**

Translate the Chinese dish names on the wall menu into English for foreign tourists. Texture Preservation : Crucial! Maintain the original aged, greasy, and textured look of the wall/paper. The new English text should look like it was written/printed on the same surface, with slight fading or wear to match. Currency : Keep the '¥' symbol and price numbers exactly as they are ; do not convert currency. Layout : align the English translations next to or replacing the Chinese characters naturally.

Source: [WeChat Article](#)

## 9.2. Digital Content Localization (Comics/Memes)

*Translates comics or memes by scrubbing text bubbles and replacing content with matching fonts.*

**Prompt:**

Translate the text in the speech bubbles/captions from [Japanese/English] to [Chinese]. Seamless Cleaning : Erase the original text and perfectly fill the background (e.g., the white speech bubble or the colored image background). Style Matching : Render the translated Chinese text using a casual, handwritten-style font (or bold impact font for memes) that matches the aesthetic of the original image. Fit : Ensure the text fits naturally within the bubbles without overcrowding.

Source: [WeChat Article](#)

## 10. Social Networking & Avatars

### 10.1. 3D Blind Box Style Avatar

*Converts portraits into cute, C4D-style “Pop Mart” toy characters.*

**Prompt:**

Transform the person in the uploaded photo into a cute 3D Pop Mart style blind box character . Likeness : Keep key features recognizable: [hair color,

[glasses, hairstyle]. Style : C4D rendering, occlusion render, cute Q-version , soft studio lighting, pastel colors. Background : A simple, solid matte color background (e.g., soft blue). Detail : The character should have a smooth, plastic toy texture with a slight glossy finish. Facing forward, friendly expression.

Source: [WeChat Article](#)

## 10.2. Pet Meme Creation

*Turns pet photos into minimalist, hand-drawn funny stickers.*

**Prompt:**

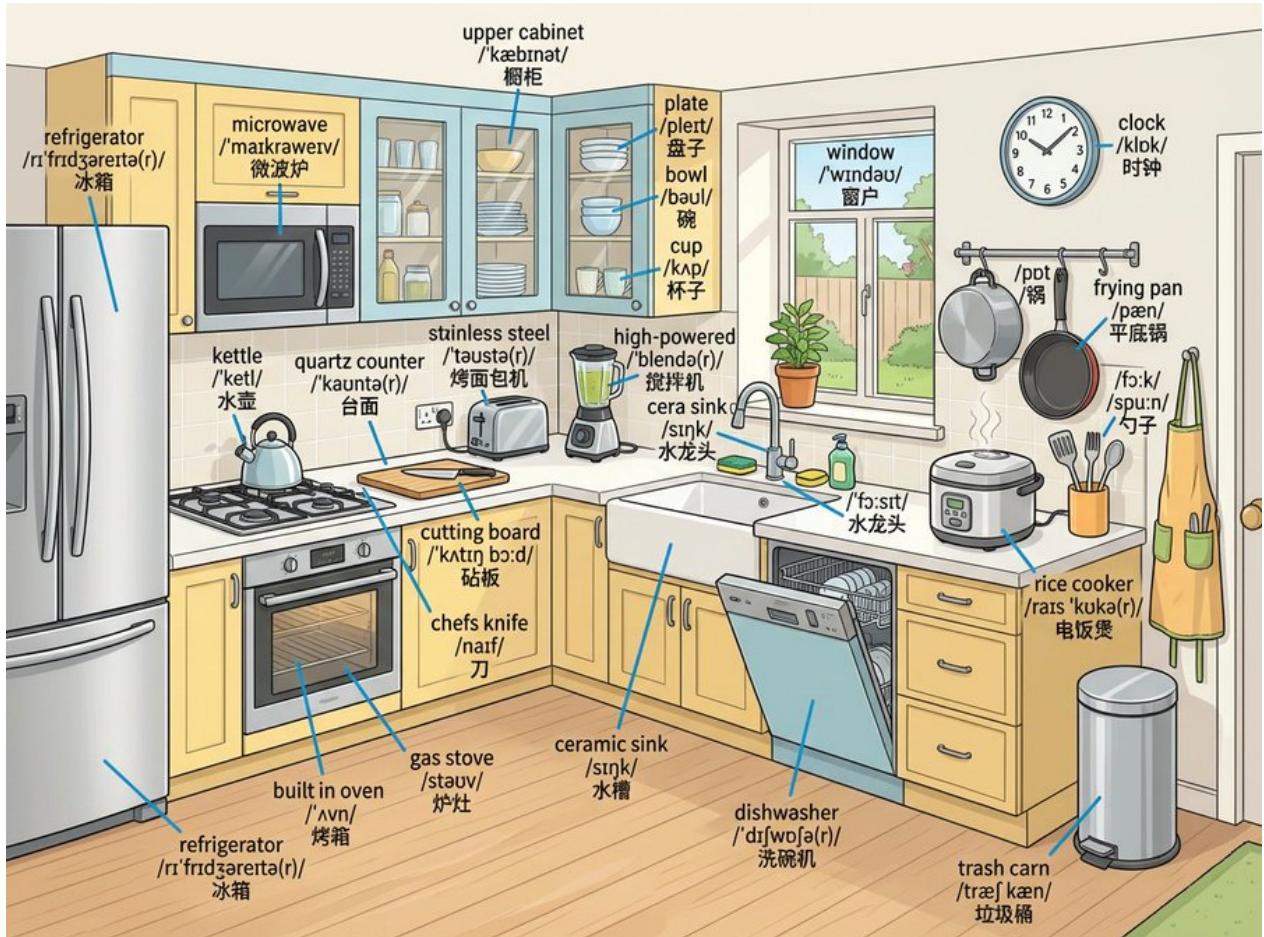

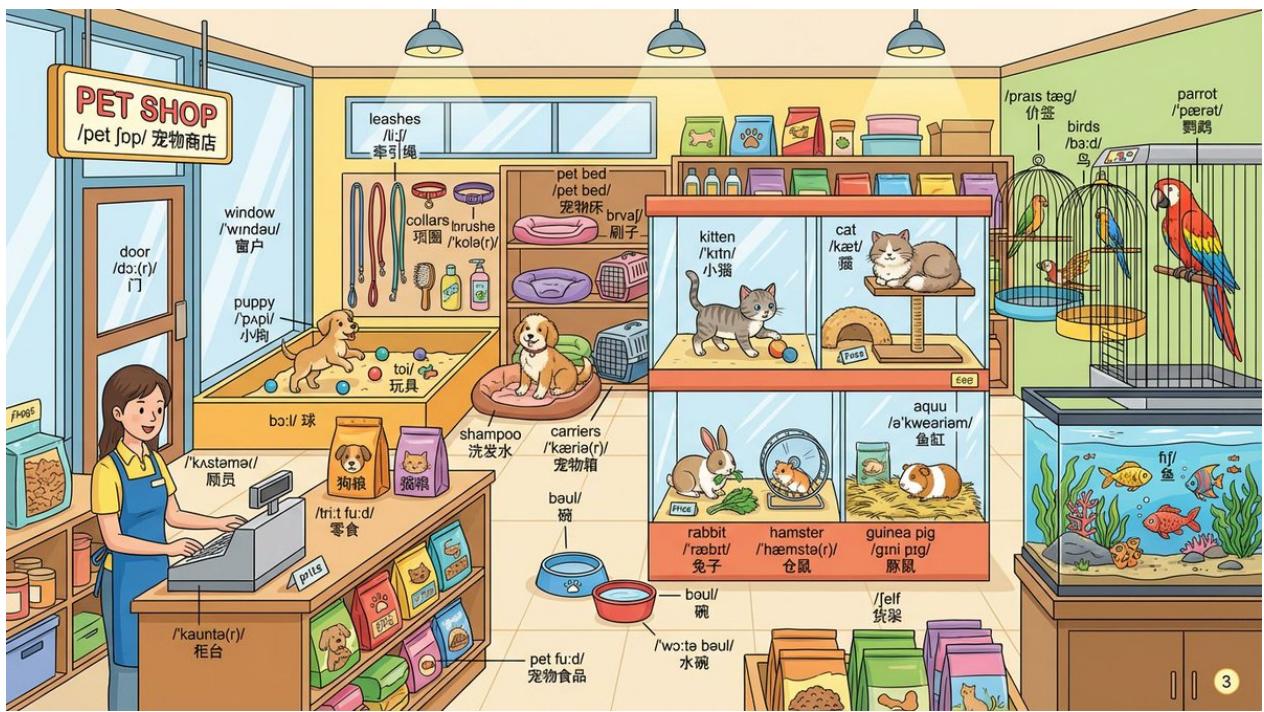

Turn this photo of my [cat/dog] into a funny hand-drawn WeChat sticker .  
Style : Minimalist ugly-cute line drawing (doodle style). White background.  
Expression : Exaggerate the animal's expression to look extremely shocked/judgemental/lazy (based on photo).  
Accessories : Add cute little doodles like sweat drops, question marks, or sparkles around the head.  
Text : Add handwritten text at the bottom: 'So Dumb'. Ensure the text style is messy and funny.

Source: [WeChat Article](#)

# 11. New Additions

## 11.1. Memory Palace Learning Technique

*A technique to help learning English vocabulary using a detailed pet store scene with labeled words.*

**Prompt:**

Create a detailed {{pet store}} scene with English vocabulary labels for all objects. The format for labeling is: Line 1: English word, Line 2: IPA pronunciation, Line 3: Chinese translation

Source: [@lxfater](#)

## 11.2. Googly Eyes and Stick Hands

*Add illustrated googly eyes and stick hands on the (object/animal/ your bff) in an exaggerated comedic pose*

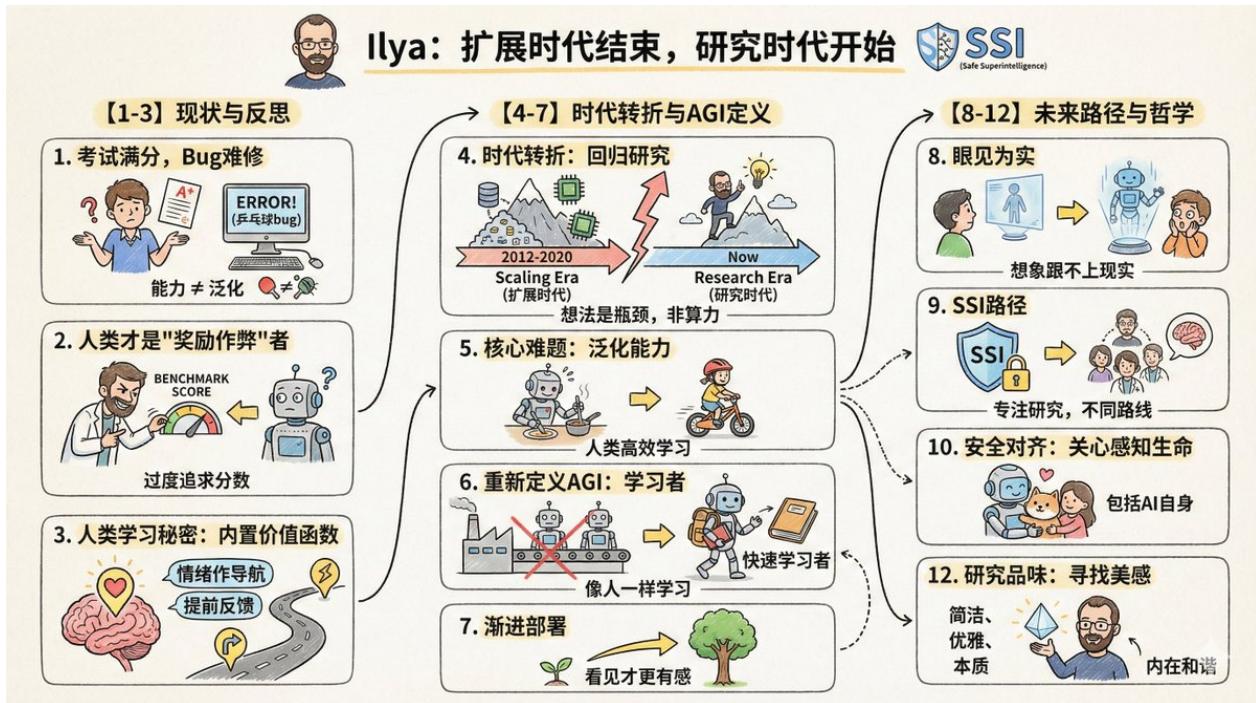

**Prompt:**

Add illustrated googly eyes and stick hands on the (object/animal/ your bff) in an exaggerated comedic pose

Source: [@madpencil](#)

## 11.3. Cartoon-Style Infographic

Convert your article/content to a cartoon-style infographic

**Prompt:**

--- Prompt ---

Please create a cartoon-style infographic based on the provided content, following these guidelines:

- Hand-drawn illustration style, landscape orientation (16:9 aspect ratio).
- Include a small number of simple cartoon elements, icons, or famous personalities to enhance visual interest and memorability.
- If the content includes sensitive or copyrighted figures, replace them with

visually similar alternatives; do not refuse to generate the illustration.

- All imagery and text must strictly adhere to a hand-drawn style; avoid realistic visual elements.
- Keep information concise, highlighting keywords and core concepts. Utilize ample whitespace to clearly emphasize key points.
- Unless otherwise specified, use the same language as the provided content.

Please use nano banana pro to create the illustration based on the input provided.

Source: [@dotey](#)

## 11.4. Weather Card Generator

*Dynamically generate a current weather card based on a given city name*

# New York

Wednesday, November 26, 2025

60°F

# Chicago

Nov 26, 2025

28°F - 38°F

**Prompt:**

--- prompt ---

Present a clear, 45° top-down view of a vertical (9:16) isometric miniature 3D cartoon scene, highlighting iconic landmarks centered in the composition to showcase precise and delicate modeling.

The scene features soft, refined textures with realistic PBR materials and gentle, lifelike lighting and shadow effects. Weather elements are creatively integrated into the urban architecture, establishing a dynamic interaction between the city's landscape and atmospheric conditions, creating an immersive weather ambiance.

Use a clean, unified composition with minimalistic aesthetics and a soft, solid-colored background that highlights the main content. The overall visual style is fresh and soothing.

Display a prominent weather icon at the top-center, with the date (x-small text) and temperature range (medium text) beneath it. The city name (large text) is positioned directly above the weather icon. The weather information has no background and can subtly overlap with the buildings.

The text should match the input city's native language.

Please retrieve current weather conditions for the specified city before rendering.

City name: 【New York】
